Β. Sign Contractor to obtain measurements at the site and not from the Drawings for correct lengths of sign supports and other items required to be accurately fitted. Design (subject to review by the Owner), engineer, fabricate and install sign supports and attachments. The Sign Contractor will be responsible for the engineering, accuracy of measurements, and the precise fitting and assembly of the finished products. Written dimensions on Drawings shall have precedence over scaled dimensions. Modifications to written dimensions shall be made only when accepted in writing by the Owner.

1.11 WARRANTY

- Sign Contractor to warrant to the Owner in writing that the materials and equipment Α. furnished under the Contract will be of good quality and new unless otherwise required or permitted in writing by the Owner, that the work will conform with the requirements of the Design Development Documents and the work will be free of defects not inherent in the quality required or permitted in writing by the Owner. Work not conforming to these requirements, including unauthorized substitutions, may be considered defective. If required by the Owner, furnish satisfactory evidence as to the kind and quality of materials and equipment.
- Β. If, within two (2) years after final acceptance of the work, any of the work is found to be defective or not in accordance with the requirements of the Design Development Documents, the work shall be corrected promptly after receipt of written notice from the Owner to do so, unless the Contractor has previously received written acceptance of such condition. Correction of work to be completed at no additional cost to the Owner. This obligation shall survive termination of the Contract. All work to be done at a time convenient to the Owner.
- C. Sign Contractor shall provide a warranty for repair or replacement due to faulty materials, workmanship and design for a minimum from the date of substantial completion for:
 - 1. Vinyl die-cut letters shall be warranted for 5 years against delamination from substrate.
 - 2. Paint finishes shall be warranted for 7 years from chalking and fading.
- D. Warrant to the Owner in writing that the acrylic polyurethane finishes furnished under the Contract will be of good quality, free of defects in appearance or application, will not develop excessive fading or excessive non uniformity of color, will not crack, craze, peel, or otherwise fail as a result of defects in materials or workmanship for a period of five (5) years beginning upon final acceptance by the Owner.
- Sheeting Replacement Obligation E.
 - 1. Where it can be shown that signs with sheeting, supplied and used according to the sheeting manufacturer's recommendations, have not met the performance requirements stated in this Specification, the Contractor shall cover restoration costs as follows for sheeting's shown to be unsatisfactory:
 - a. For ten (10) years after date of installation, the Contractor will replace the sheeting required to restore the sign surface to its original effectiveness. In addition, for

Glenbrook South High School Wayfinding Signage & Graphics Interior & Exterior Signage 10 14 23 February 01, 2021 IFB-Revision 0

SIGNAGE SPECIFICATIONS

- restoring the sign surface to its original effectiveness at no cost to the Owner for materials and labor
- F. Fastening devices and adhesives should be tamper-proof, non-corrosive and warranted as to permanency of performance.
- G. Failure includes: but not limited to: fading, cracking, crazing, warping, bowing, oil-canning, peeling, oxidizing, delaminating, rusting, corroding, improper functioning of electrical devices, loose welds, joints and panels and structural failure because of faulty materials and or workmanship
- Н. owner
- Products corrected under the warranty shall have a warranty extension of a minimum of 1 one year from the date of correction in addition to the two year warranty.
- Warranties shall commence on the date of Substantial Completion, as determined at J fabrication kick-off between Owner, Signage Consultant and Sign Contractor.

PART 2 - PRODUCTS

- 2.1 GENERAL SIGN CONSTRUCTION
- Sign materials, design, sizes and thickness shall be as shown on Drawings and herein Α. specified. Methods of fabrication, assembly and erection, however, unless otherwise specifically stated, shall be at the discretion of the Sign Contractor, whose responsibility it shall be to guarantee satisfactory performance as herein specified.
- Β. Sign components, letters, symbols, and logos shall be constructed to present a neat, clean appearance. Edges and corners shall be true and free of saw marks or other defects. All external surfaces of sign components, faces, structural brackets, elements, and pendants to be finished to match colors specified. Owner/Sign Consultant reserves the right to reject any signs that fails to meet the standards established in the approved prototypes.
- Sign Contractor to provide interior sign assemblies. Contractor to furnish to the Owner C. engineering calculations to show that maximum stresses and deflections of signage, and signage support system, do not exceed specified performance requirements under full design loading.
- D. Provide concealed, tamper resistant fasteners and hold open devices (where required) adequate for safety and ease of maintenance.

- Ε. Anchor bolt sizes and types should conform to the Shop Drawings prepared and stamped by the Contractor's licensed professional structural engineer (where required). All bolts should be properly tightened and equipped with nut-locking devices when structures are erected.
- F. Insofar as practicable, fitting and assembly of the work shall be done in the shop. Work that cannot be permanently shop-assembled shall be completely assembled, marked, and disassembled before shipment, to insure proper assembly in the field. Unless otherwise noted, field joints in the face of signs will not be allowed. Contractor to coordinate sizes of finished assemblies with access limitations to final locations
- G. Steel and aluminum shall be well formed to shape and size. Fabrication shall leave clean, true lines and surfaces. Carefully match exposed work to produce continuity of line and design. Joints, unless otherwise shown or specified, shall be accurately fitted and rigidly secured with hairline contact. Structural details are schematic and the Contractor shall be responsible for thickness of metal and details of assembly and support to give adequate strength and stiffness.
- H. Welding shall be in accordance with appropriate recommendations of American Welding Society, and shall be done with electrodes and methods recommended by manufacturers of alloys being welded. Type, size and spacing of welds shall be as shown on Shop Drawings. Welds behind finished surfaces shall be so done as to minimize distortion and discoloration on finished side. Weld spatter and welding oxides on finished surfaces shall be removed by descaling or grinding. Unless otherwise shown or specified, all weld beads on exposed polished surfaces shall be ground and polished to match and blend with finish on adjacent parent metal. Remove paint from existing steel members at contact areas and on surfaces with 2 inches of field welds, in order to attach signage steel supports. At attachments to exposed steel, grind exposed field welded joints smooth and restore to match factory finishes.
- 1 Welding shall be executed by experienced, certified operators with proper equipment and training and who have been qualified previously by tests as prescribed in the American Welding Society's "Standard Qualification Procedure" to perform the work required.
- J Interior ADA Compliant Signs:
 - 1. Comply with American Disabilities Act, ADA Standards for Accessible Design as revised in ADA 2012 regulations and requirements indicated for copy height, letter stroke, materials, thickness, finish colors, as noted in the Design Documents.
 - 2. Sign face to be custom finish acrylic panel. Copy and Braille to be relieved 1/32inch minimum from plaque first surface by manufacturer's applique process. Precisely formed, uniformly indicated for size, style, spacing, content, position and color. Sign copy and Braille to comply with relevant ADA regulations and the requirements indicated for size, style, spacing, content, position and color. Sign Contractor to translate sign copy to appear in ADA compliant Braille.
- к Source Quality Control:
 - 1. Obtain primary materials from a single manufacturer.

- М Typography: Letter weight to match Design Intent Drawing specifications. Sign face layouts shown on the Drawings are for reference only. Shop Drawings to show letterforms with inter-letter and inter-word spacing per the standards for the font used. Legends shall include letters, numbers, arrows, symbols, glyphs, icons, logos, graphics, borders, characters, typography, and other applications shown for sign panels. Enlargement or reduction of artwork applications shall be done photographically. Hand-cut masks or templates will not be accepted. Contractor to submit samples of all alphabets, symbols, arrows, and logos for review and approval prior to fabrication. Font name(s) and color breaks/application to be indicated on the Shop Drawings.
- Letterforms: shall be executed in such a manner that all edges and corners of letterforms N. and symbols are true, clean, and photographically precise and must accurately reproduce the letterforms.
- О. Symbols: Symbols, glyphs, icons and logos to match standards as shown. Original art for all symbols/glyphs/icons, and logos to be supplied by Signage Consultant. Symbols and logos shall be executed in such a manner that all edges and corners are true, clean, and photographically precise and must accurately reproduce the symbol or logo.
- 22 PAINTING AND FINISHING
- Paint to be applied per manufacturer's instructions. Protective coating primer system to be Α. shop applied. Steel material shall be shop coated with 1 coat of primer. Surfaces that will be inaccessible for painting after assembly or installation shall be given 2 shop coats of primer. Provisions should be made for proper handling at all stages of the painting shipping storing and erection for protection of primed surfaces from damage or soiling.
- Β. Shop painting shall not be performed on the following surfaces: (Protect these surfaces with a rust inhibiting coating readily removable prior to erection.)
 - 1. On contact surfaces within two inches of field welds.
 - 2. On contact surfaces.
 - 3. On milled bearing surfaces.
- Colors listed for application using paint/coating specified. Color numbers refer to the C. Drawings. Submit appropriate samples for review and approval. Owner to have sole authority to determine whether match is accurate.
- Aluminum and steel shall be prepared by cleaning in accordance with SSPC SP-1 and D. shop painted with primer and finish coats using paint material specified for sign frames and structures.
- E. After being ground and polished, or where subject to severe forming operations, stainless steel surfaces shall be cleaned of all extraneous material, thoroughly rinsed with clean water and dried. Lubricants used in fabrication shall be removed before work leaves the shop.

SIGNAGE SPECIFICATIONS

- F and washers, etc.) one coat.
- G. Protection of metals against galvanic action shall be provided wherever dissimilar metals are in contact with galvanized steel. All metals except galvanized steel and stainless steel, which will be in contact with concrete, mortar, plaster, or other masonry, shall also be protected. Protection shall consist of providing stainless steel fasteners and, if concealed, of painting the contact surfaces with a heavy brush coat of bituminous paint.
 - Products:

н

Ι.

- 1. Aliphatic Polyurethane Enamel: Low VOC M.A.P. High Solids Acrylic Polyurethane System, Matthews Paint Co, Pleasant Prairie, WI 53158. (1-800-323-6593) Manufacturer's specification MPC108.
- level to be determined by application.
- 3. Gloss level of finish shall be as indicated on drawings.
- Application and Finish:

Coatings shall be applied by an applicator having facilities, equipment and experience required to apply the finish to manufacturer specifications. All substrates shall be cleaned of any foreign substance such as oil, grease, dirt, etc.

- 1. Aluminum components to receive painted finish: All faces shall be etched to give an even satin finish and remove oxidation, then conversion coated to improve paint adhesion and inhibit corrosion. Surface shall be belt-sanded for a smooth finish, edges filed and ground then immersed in hot alkaline cleaner to remove contamination.
- 2. Provide manufacturer's Recommended System as appropriate for specific substrates and applications.
- 3. An acid-wash prime coat shall be applied per manufacturer's specifications when using raw metal as a substrate.
- 4. A primer / filler seal coat shall be properly applied to all substrates per manufacturer's specifications
- 5. Primer / filler coat shall be sanded smooth before top coating and coated with a minimum of two applications of acrylic polyurethane in colors as indicated on the drawings. Top coating shall be applied per manufacturer's recommendations to a minimum total dry film thickness of 2.0 mil.
- 6. All painting shall be free of oxidation, cracking, chipping, or any defect. Sign Contractor shall be required to touch-up or otherwise repair any damage to painted surfaces to the satisfaction of the Designer or Owner.
- 7. Sign panels shall be predrilled in proper locations before any priming, painting or coating processes.
- 8. Adhesion: No removal of any finish after 1/16" cross-hatching to base metal, impacting to the point of metal rupture, and subjecting to application and quick removal of cellophane tape

Pigmented (Opaque) Finishes: .1

Completely cover to provide an opaque, smooth surface of uniform color, appearance, and cover. Cloudiness, spotting, holidays, laps, brush marks, orange peel, runs sags, or other surface imperfections will not be acceptable

- 2.3 SILKSCREENING
- Provide highly quality fine mesh photographic screens. Hand cut screens will not be Α. accepted. Screens shall be fine mesh fabric as required.
- Silkscreen inks to be compatible with specified substrates and finishes. Do not blend Β. materials from different manufacturers.
 - 1. Acceptable Silkscreen Ink Manufacturers:
 - a. Naz Dar
 - b. Akzo Coatings
 - c. Spraylay Corp.
 - 2. Inks for use with 3M Sheeting
 - a. 3M 880 Series Ink and thinner for use with Series 3990 and 3870 3M Sheeting
 - b. 3M 3900, 9700 UV Series ink for Scotch Cal 7725 and 3650

DIGITAL PRINTING 24

Digital Flatbed Α.

- 1. Acuity Advanced X2.
- 2. Rigid print format: 98.4" wide x 120" length edge to edge printing.
- 3. Max. substrate thickness: 1.89"
- 4. Print technology: Proprietary Plezoelectric UV inkjet head using variable-dot grayscale imaging technology; 4 color (CMYK) with two print heads per color.
- 5. Resolution: Variable droplet sizes from 6 to 30 picoliters.
- 6. Rip: ColorGATE Production Server (Fujifilm Edition), Version 5.3 or later. ONYX ProductionHouse Workflow Software, Version 7.0 or greater.
- 7. Sericol Uvijet UV Inks: Uvijet KI Ink range is a high quality UV curable inkjet system, for Piezo Drop-on-Demand print heads, specifically developed for use with the Acuity Series of printers from Fujifilm. (CMYK + W) KI-215/2L Cyan, KI-052/2L Yellow, KI-004/2L Black, KI-867/2L Magenta, KI-021/1L White.

2.5 METAL MATERIALS

- Α. Aluminum Extrusions:
 - 1. Conform to ASTM B- 221, Alloy 6063-T6. Shapes, sizes and weights of members shall be a required for structural stability. All connections of aluminum members shall be heli-arc welded, continuous fillets, and ground smooth on all exposed faces, unless specifically detailed otherwise.
 - 2. Finishes as shown on drawings.

SIGNAGE SPECIFICATIONS

Aluminum Finishes

В

D.

G

- 1. Finishes shall be consistent in color and surface appearance throughout the project.
- 2. Matte finish clear anodized: AA M12 C22 A41. Except as otherwise indicated or
 - directed by Designer, use this type finish for all exposed aluminum.
 - 3. Matte finish color anodized: AA M12 C22 A42. 4. Bright finish - clear anodized: AA M21 C31 A41.
- C. Aluminum Sheet and Plate: 1. Type 5052-H-32 alloy aluminum, thickness as indicated on drawings.
 - Stainless Steel:
 - 1. Type 302 or 304, to meet ASTM A167.
 - 2. Exposed surfaces shall be No. 4 finish, unless otherwise indicated.
 - 3. Unexposed surfaces shall be mill finish.
- Ε. Stainless Steel Tubing:
 - 1. Type 300 Series, to meet ASTM A269 or ASTM A312.
 - 2. Exposed surfaces shall be No. 4 finish unless otherwise indicated.
 - 3. Unexposed surfaces shall be mill finish.
- F Metal Thickness:

Provide metal thickness indicated on drawings. When metal thickness is not indicated on drawings, provide thickness most appropriate for the fabrication condition to prevent warping or distortion.

- 1. For sheet steel not indicated, use not less than 20 gauge.
- Corrosion Protection: Coat concealed surfaces, which will be in contact with concrete, stone, masonry, wood, or dissimilar metals, in exterior work, with a heavy or double coat of bituminous paint.

2.6 PLASTIC MATERIALS

Α. Acrylic:

Provide cast (not extruded) methyl methacrylate Monomer plastic sheet with a minimum flexural strength of 16,000 psi, when tested in accordance with ATSM D790, minimum allowable continuous service temperature of 180 degrees F. 1. Provide solid sheet, laminated sheet, or cast acrylic in size, thickness, clarity, opacity,

- texture, and color required for work or specified in Contract Documents.
- are to be smooth unless otherwise specified.
- transmittance of 92%, when tested in accordance with ASTM D 1003, in a non-glare finish unless otherwise indicated. The non-glare finish should not compromise the clarity or resolution of the displayed image.

| SIGNAGE SPECIFICATIONS | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| C. Verify that sign-support surfaces are within tolerances to accommodate signs without gaps or irregularities between the backs of signs and support surfaces unless otherwise indicated. | |
| D. verify that electrical service is correctly sized and located to accommodate signs (where required). | |
| E. Proceed with installation only after unsatisfactory conditions have been corrected. | |
| F. Protection: Mask off and protect all finished building surfaces, which may be stained, damaged or adversely affected by installation of the signs. | |
| G. Clean and prepare all finished surfaces and suitably protect until acceptance by Owner. | |
| 3.3 INSTALLATION | |
| A. Properly and legally remove from the site and dispose of all rubbish and debris resulting from the work. | |
| B. Obtain all necessary licenses and permits. | |
| C. Before delivery to the site, each sign shall be tagged or labeled with Sign Contractor's name, sign type, level/floor, and sign location installation number as shown on the Drawings. Labeling shall be both on the sign and the protective covering. Labels on the signs shall be hidden when the sign is installed (unless otherwise specified) or shall be removed without damage to the sign at time of installation. | |
| D. Sign Contractor to arrange with the Construction Manager to provide adequate, secure, locked storage for signs, which have been delivered to the site but not yet installed. If adequate storage space is not available, the Sign Contractor is to coordinate delivery of the signs to coincide with installation. | |
| E. Sign Contractor shall provide for on-site project manager to supervise installation crews and will provide daily update on installation progress. | |
| F. Prior to sign installation, sign contractor shall coordinate x-raying or will utilize pachometer technology to identify locations of the hidden reinforcement in the concrete prior to drilling any hole deeper than ½". If the investigation of the concrete identifies existing reinforcement will interfere with the planned mounting location of the signage, the sign contractor shall immediately notify the Construction Manager and is not permitted to relocate any of the signs without written authorization. | |
| G. Install signs level and plumb. | |

- Н. Provide for all anchors and fasteners required to secure signs. All anchors/fasteners shall be appropriate for the anchorage condition and be non-corrosive type. Any signs that require cutting building surfaces shall be coordinated with the Owner and General Contractor. Sign Contractor shall be responsible for repairing and patching affective area.
- Ι. Surfaces under adhesive-applied signs shall be smooth, clean and free of dust, oil, fingerprints and foreign matter. All adhesives required shall be used in accordance with the manufacturers specifications. Signs shall be permanently installed unless otherwise indicated in shop drawings. No adhesives, which will fade, discolor or delaminate as a result of ultraviolet light or heat shall be used.
- J. Installation of temporary signs shall use low tack adhesive to prevent wall damage upon removal.
- After installation, clean soiled sign surfaces and installation area. Remove dirt, dust, K. fingerprints, shavings, adhesives, packing materials, etc.
- L. Where applicable, all attic stock ordered is to be packaged separately and packaged by sign type with installation instructions and all mounting hardware and adhesives for varying field conditions. If not specified for removal from the site and proper disposal by the General Contractor, the Sign Contractor is to arrange with the Owner to provide secure, locked, long term storage for all Attic Stock signs, sign structures or materials taken down, removed or dismantled.

3.4 COMPLETION

- Α. The work shall be under the charge and care of the Contractor until final acceptance of the work by the Owner (ie. Substantial Completion), including all Punch List work. The work shall not be considered as completed and accepted until written notice is received from the Owner confirming the completion and acceptance of all work, including Punch List work.
- В. Upon completion and before final acceptance of the work, the Contractor shall provide a complete set of drawings and digital files for all signs and sign locations showing As Built conditions. Drawings and digital files shall be formatted as specified by the Owner. As Built Drawings to include changes between the work as shown in the Contract Documents and Shop Drawings indicating the work as actually installed and any specific information, locations, or dimensions not included in the Contract Documents.
- C. All digital files, silk-screens, patterns, and models are to be preserved and shall become the property of the Owner.
- D. Punch List:

When the Sign Fabricator has completed their own internal review for completion and considers the work to be acceptable to the Owner / Sign Consultant as substantially complete; the Sign Contractor produce a punch list and attach it to a letter requesting an inspection. Upon receipt of the Sign Contractor's Punch list and written request, the Sign
